

Personal Initiatives

by Robert Wilkins III

- DevOps for Non-Coding Teams
 - Github repos for projects and issues
 - Project Tasks and updates are submitted as if code
 - Changes are documented and tracked
 - Automatic asset tracking/provisioning
 - Chef/Ansible/Saltstack/Puppet
- Service Industry Employee Productivity Enhancement
 - Short work days (2 hr mornings, 1 hr lunch break, 2 hr afternoons)
 - Remote-Work capability (VPN, Cloud Desktop/Storage)
 - Short & Definite Deadlines (e.g.: 1 week instead of 1 month)
- Flexible Compensation Plans
 - Salary can be broken into various parts
 - Sign-On Bonus
 - Increasing/Decreasing Salary year-over-year
 - Pay off Bills and provide lower take-home pay
 - Salary Advancement with Commitment to stay for X-years
- Limited Multitasking
 - Code & automate as much work as possible
 - Delegate what cannot be coded or automated
 - NEVER do the same Project/Task/Function more than twice without increased efficiency
 - Track EVERYTHING and apply timers to all tasks
 - Apply priorities and resource costs to all tasks
 - Provide automatically generated reports on this to management twice daily (morning/evening) via auto-sent email with attached reports
- Concerned that you'll get bored in this position...
 - I've been asked this a few times. The job needs...
 - Challenges
 - Opportunity to grow
 - Work/Life Balance
 - Autonomy (NO Micro-Managing)
